

Security belongs in the hands of the user.

## Profile

- Secure communications for end-users
- B2B. Hardware, software, & services
- Initial patent awarded OCT 2022 (*US11461507B2*)
- Launching initial product Q2 2023
- Initial funding from DoD (*SOFWEX*)
- Raising angel round via convertible note

End-point devices are  
**fundamentally insecure,**  
*at scale and over time.*

**Remote work and travel**  
expose companies to  
these risks.

Best: *don't put high value secrets in your phone.*

**Risky:** Do your best with software solutions and hope you aren't targeted.

**LastPass security breach was worse than you've heard. Here's what to do.**

By [Hiawatha Bray](#) Globe Staff, Updated January 9, 2023, 2:54 p.m.

**WhatsApp data leaked - 500 million user records for sale online**

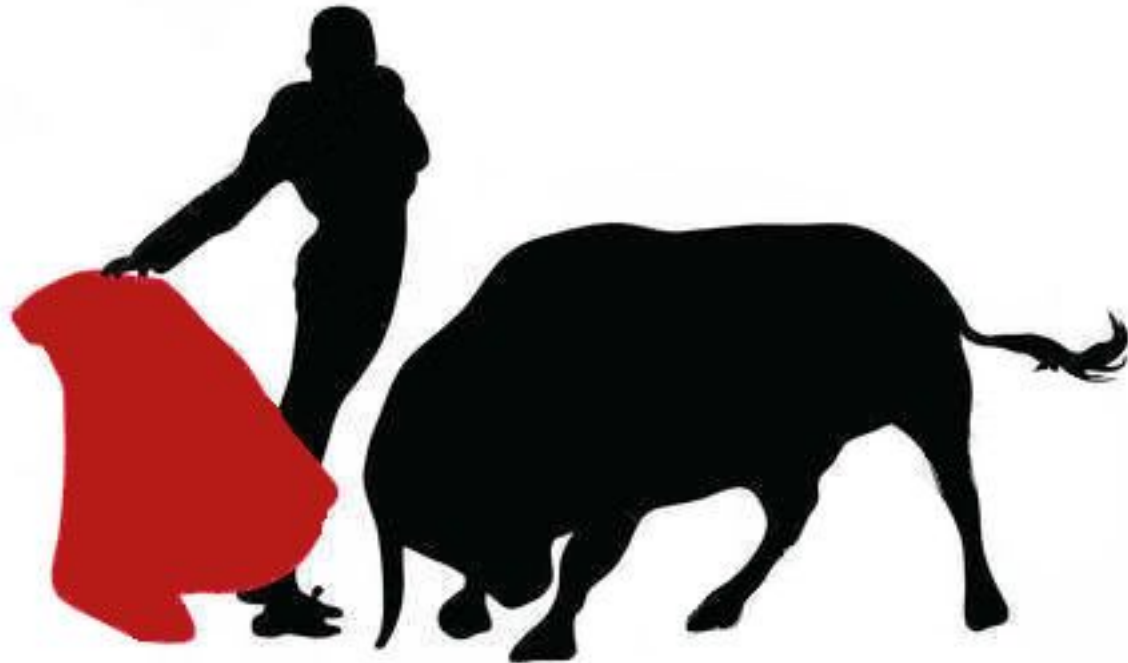

[Jurgita Lapienyte](#), Chief Editor Updated on: 13 December 2022 10

**Apple fixes 'actively exploited' zero-day security vulnerability affecting most iPhones**

[Zack Whittaker](#) [@zackwhittaker](#) / 1:45 PM CST • December 13, 2022

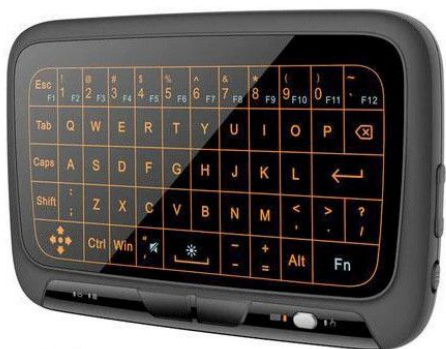

**Sidestep the complexity.**  
But work *with* the end-point device.

Purpose-built solution, from the **hardware** up, made in the US.

Keep key security functions **outside the end-point device** but still accessible.

\*About the size of business card

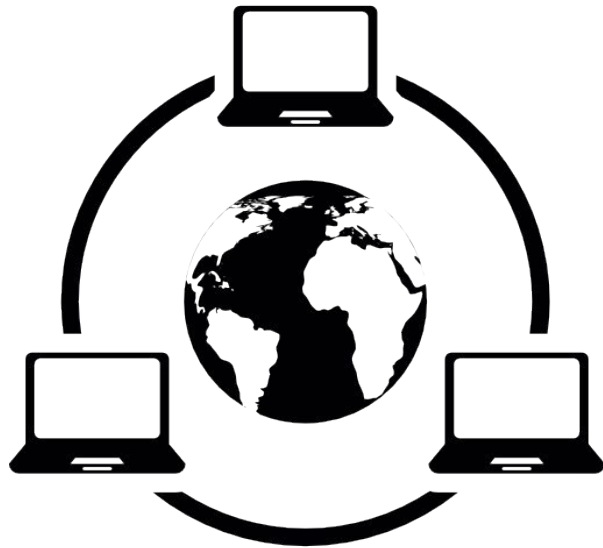

## Anigma Keyboard

- Password manager & two-factor auth
- Encrypted messaging & photos
- Remotely inaccessible data encryption

## Aether Hotspot

- VPN/Firewall for WiFi & cellular data
- Optional peer-to-peer mesh capability
- Protects devices from hostile networks

## Commercial Services

- Enterprise Integration Gateway
- Cloud back-ups
- Network Access Points
- Messaging gateway
- Third-party integration

# Jason Rexilius

“I’ve lived my customers’ daily lives.  
They are my friends and colleagues  
and I care deeply about keeping them  
secure.”

## Experienced Entrepreneur

Founder, co-founder, and interim CTO

## Veteran USAF Intelligence Analyst

## International Humanitarian Volunteer

Relief operations in many countries

## Global Technology Consultant

Business travel across Asia, Europe, and Latin America

## End-User:

High-value personnel,  
**working remote** or  
**travelling.**

Market-Size:  
**\$4bil**

## Initial Target Markets:

### Commercial

Energy sector  
Fortune 500 key employees  
Finance & Trading  
Legal, Political, Celebrity, Wealthy, etc.

### Government & Defense

Top-secret cleared personnel  
State, DoE, Commerce  
Five-eyes & NATO partners  
FBI, DEA, other LE

## Product:

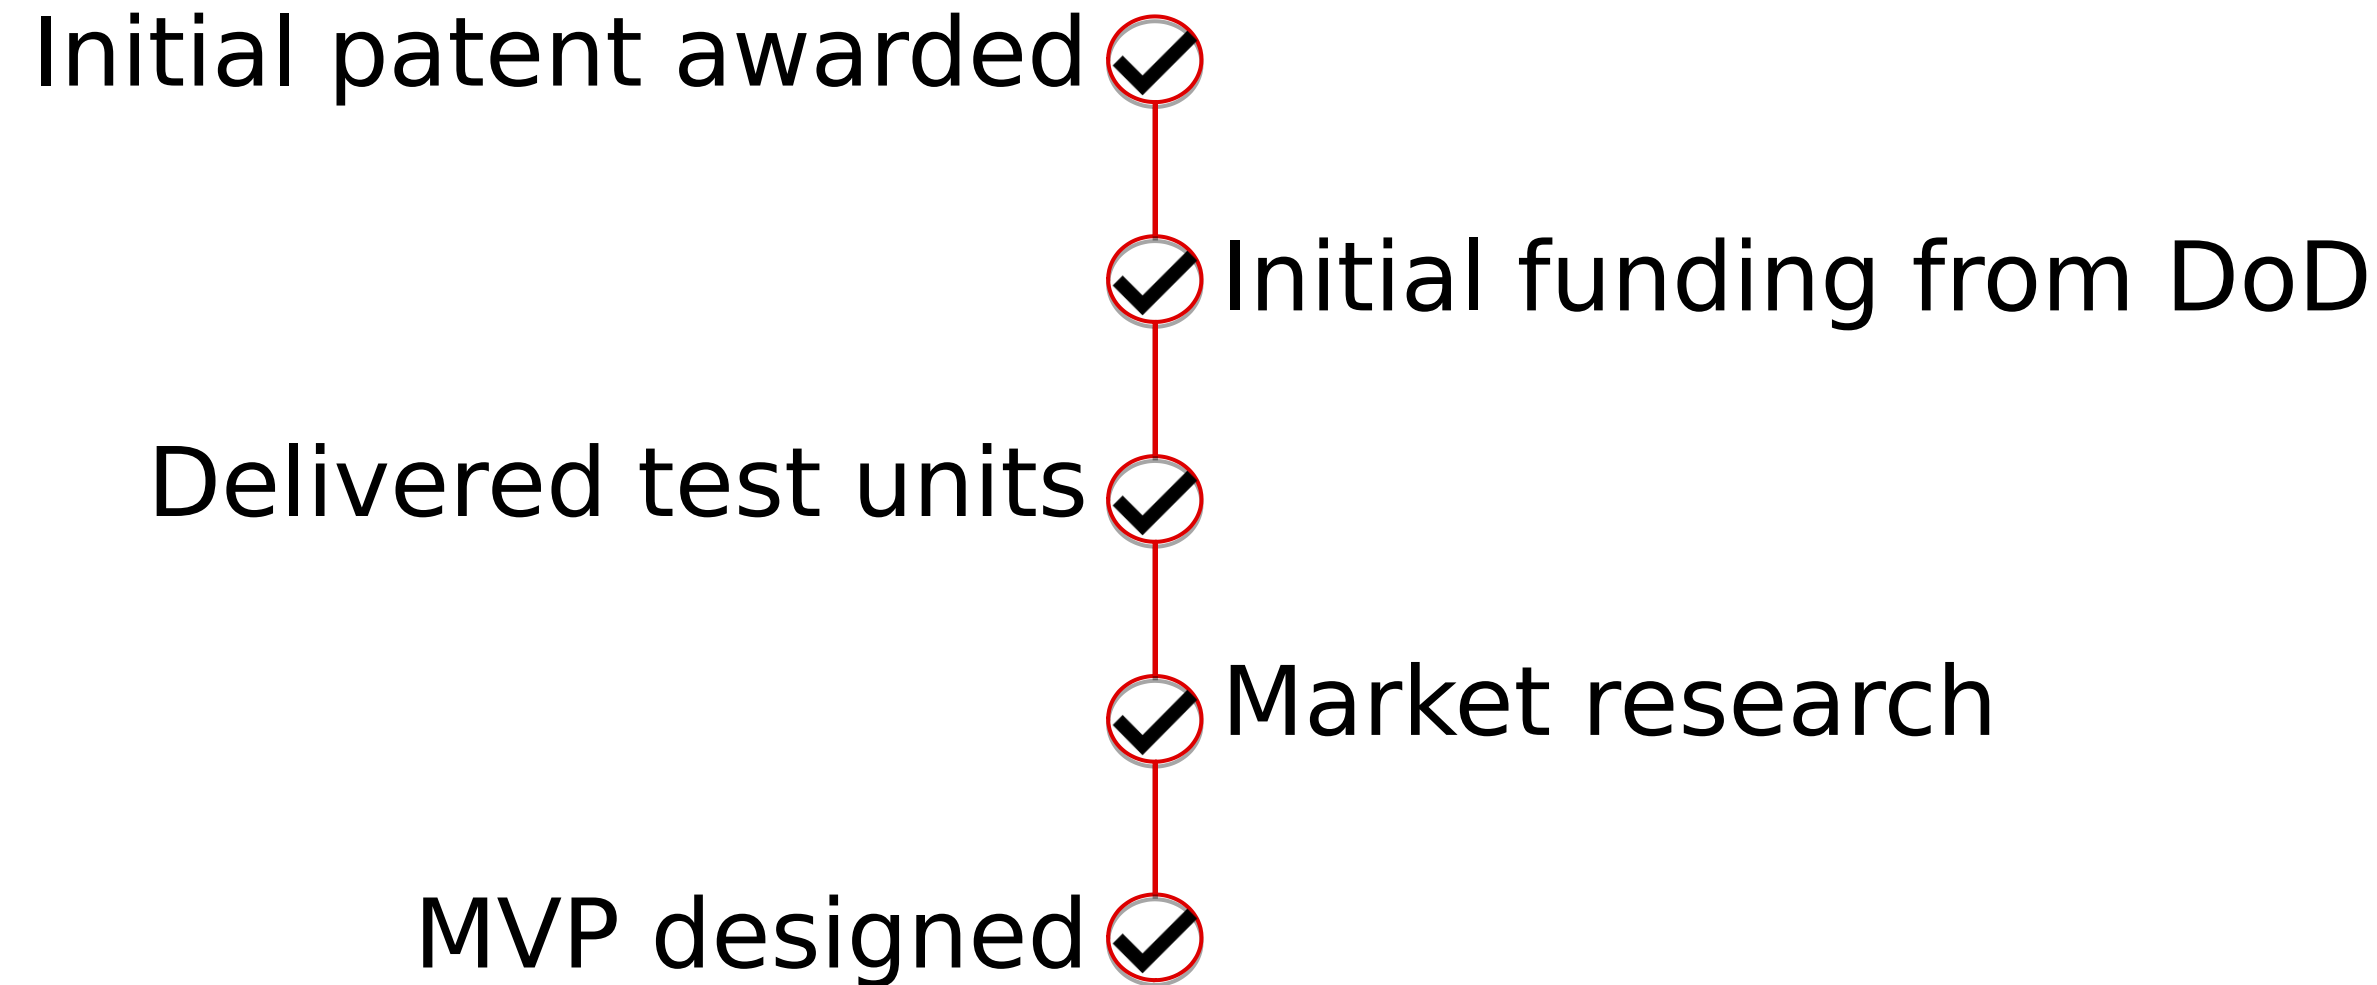

- 🎬 Security peripherals with software and services.
- 🎬 Hardware can be adopted by end-users directly.
- 🎬 Enterprise software appliances for integration & management.

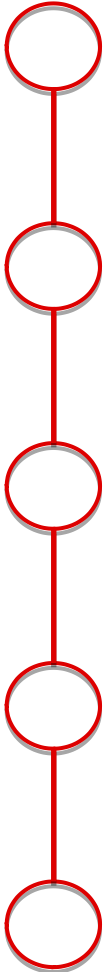

## Model:

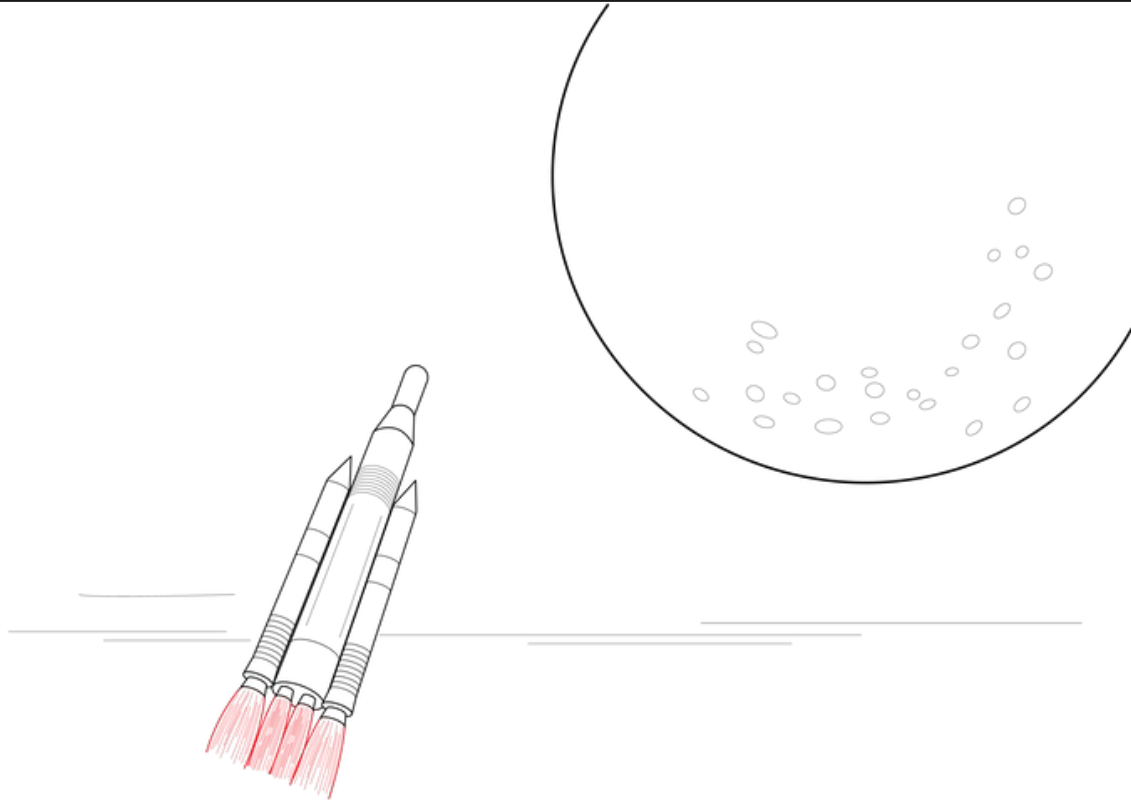

Direct sales early adopters. B2B sales via partner and VAR channels.

## Advantages:

- Existing network
- Recurring revenue
- Support not replace

- 
- **Raise Angel Round** (Convertible, \$750k min close, \$1.2m max)
  - **Branding and PR campaign** (lead up to Kickstarter)
  - **Product Development** (initial App and plug-ins)
  - **Audit & Usability Testing** (security and usability testing)
  - **Launch Crowdfunding** (marketing and manufacture prep)
